

How to Use These Guidelines

The purpose of these guidelines is to ensure that the Block DX identity is clearly and consistently expressed across every communication channel.

Consistent and correct usage of our identity in all applications will drive brand recognition and help to elevate brand preference.

What Defines Us

We're Not

Company
Centralized
Closed
Bureaucracy
Shareholders

We Are

Project
Decentralized
Open
Community
Members

1.2 Brand Character

Mission & Values

WHAT WE STAND AGAINST

Exclusion

Restrictions and constraints that minimize control an individual has in terms of their assets and information.

WHAT WE STAND FOR

Galvanization

To enable the power of connectivity through the free-flowing exchange of ideas.

WHAT WE BELIEVE IN

Community

Respect members and inspire dialogue and involvement.

Empowerment

Enable a sense of self-sovereignty.

Freedom

Remove barriers that inhibit individual control.

1.3 Brand Character

Voice & Tone

This is how we speak as a collective brand in both internal and external communications.

Confident

We speak with clarity and precision, and lead the way based on proven facts.

Embracing

We are welcoming, approachable and accessible to all people, communities and platforms.

Empowering

We enable control and the liberty to pursue one's own personal goals.

Optimistic

We have a positive view of the future and are inspired by the exchange of new ideas that accelerate progress.

1.4 Brand Character

Brand Narrative

From business to technology, change is happening faster than any other time in our history. But standing in the way of even greater progress is a myriad of restrictions and constraints that place unnecessary limitations on assets and information.

At Blocknet, we believe in giving individuals the unrestricted freedom to achieve what's next. We remove bureaucratic barriers. We bring together isolated silos. Blocknet provides endless possibilities across projects and communities. We deliver true interoperability and decentralization to the blockchain.

**We are
Blocknet.**

1.4 Brand Character

Brand Narrative

Our mission is to help the technology realize its true potential and to inspire people to dream what's possible.

—
The **protocol**
to seamlessly
move data and
share ideas.

—
The **confidence**
to exchange
tokens
peer-to-peer.

—
The **reliability**
to create
frictionless
contracts.

—
The **speed**
to scale apps
and digital
services.

—
The **sovereignty**
to build
the future
you want.

Welcome to a new era of interconnectivity.
Join our engaged community of thinkers
dedicated to the free-flowing exchange
of information.

1.4 Brand Character

Brand Narrative

One place. One protocol.
The Blocknet connects people with

**limitless
opportunity.**

2.1 Identity

Primary Logo

The foundation of our identity is the Block DX logo. This is the primary logo mark to be used in brand communications.

The logo utilizes slight color gradients to symbolize seamless interoperability and the free-flowing exchange of ideas in a decentralized network.

2.2 Identity

Logo Construction

The Block DX logo has been designed with a similar shape and form to the Blocknet logo to create a unified brand architecture.

The Block DX logo is a visual representation of 'Decentralized Exchange' and stands as a powerful, sophisticated and energetic symbol for the 'DX'.

The two logos share the same underlying grid system which brings harmony and balance to a true family of brand identities.

2.3 Identity

Small Logo

For successful reproduction at small scales, we have created two versions of the Block DX logo. The small logo should be used **ONLY** when the primary logo will not reproduce well.

The small logo has been flattened as a simplification for small scale applications.

Sample applications:

- Favicon
- Emoji
- Coin market cap
- Small avatars

2.4 Identity

Minimum Size

To ensure that the Block DX logo is always rendered as clear and sharp as possible, please abide by the following size restrictions:

Primary Logo

Use the primary logo in applications 32 pixels or taller.

Small Logo

Use the small logo in applications 31 pixels or smaller in height.

2.5 Identity

Logo Color Combinations

There should always be a clear contrast between the logo and the background.

Primary Logo (negative)

The negative version of the primary logo should only be used on a dark background.

Primary Logo (positive)

The positive version of the primary logo should only be used on a white or very light background.

White Logo

The white version of the logo should only be used when the background does not provide sufficient clarity and legibility for the use of the primary logo.

PRIMARY LOGO (NEGATIVE)
ON DARK BLUE

PRIMARY LOGO (POSITIVE)
ON WHITE

WHITE LOGO
ON COLOR

2.6 Identity

Logo Lockup

The Block DX logo lockup combines the logo symbol with a typographic treatment. Use the logo lockup when additional context or branding is needed. Shown are both horizontal and vertical versions to provide flexible design options.

Do not typeset 'Block DX' unless it is being used in sentence format.

Sample applications:

- Advertising
- Digital Banner Ads
- Marketing Material

SINGLE-LINE (HORIZONTAL)

STACKED (VERTICAL)

2.7 Identity

Clear Space

For maximum visibility and impact, keep a minimum space around the logo is equal to half of the size of the logo.

Do not let text, imagery, or any other elements invade that space.

PRIMARY LOGO

SINGLE-LINE
(HORIZONTAL)

STACKED
(VERTICAL)

2.8 Identity

Incorrect Uses

Do not alter the logo or logo lockup in any way. The following examples illustrate a few improper applications of the logo.

1. **DO NOT** crop or obstruct the logo.
2. **DO NOT** change the colors of the logo.
3. **DO NOT** stretch, squeeze, skew, rotate or otherwise distort the logo.
4. **DO NOT** place the positive logo on a dark background.
5. **DO NOT** add shadows or other effects to the logo.
6. **DO NOT** place on a background that provides insufficient contrast or compromises legibility.
7. **DO NOT** alter the gradient within the X.
8. **DO NOT** place the primary logo on colored backgrounds.
9. **DO NOT** use strokes on the logo.
10. **DO NOT** retype any logo element.
11. **DO NOT** reposition logo elements.
12. **DO NOT** resize logo elements.

3.2 Visual System

Typography

Open Sans is the Block DX primary typeface and provides excellent legibility and economy of space across a variety of applications.

Roboto Mono is the secondary typeface that offers a mono-spaced font which allows letters and characters to occupy the same amount of horizontal space. Use Roboto Mono when visualizing data or organizing columns of numbers.

6.207800

3.3 Visual System

Pattern

Utilizing the foundational design grid, the Block DX brand identity can take on other dynamic forms through the use of a flexible pattern.

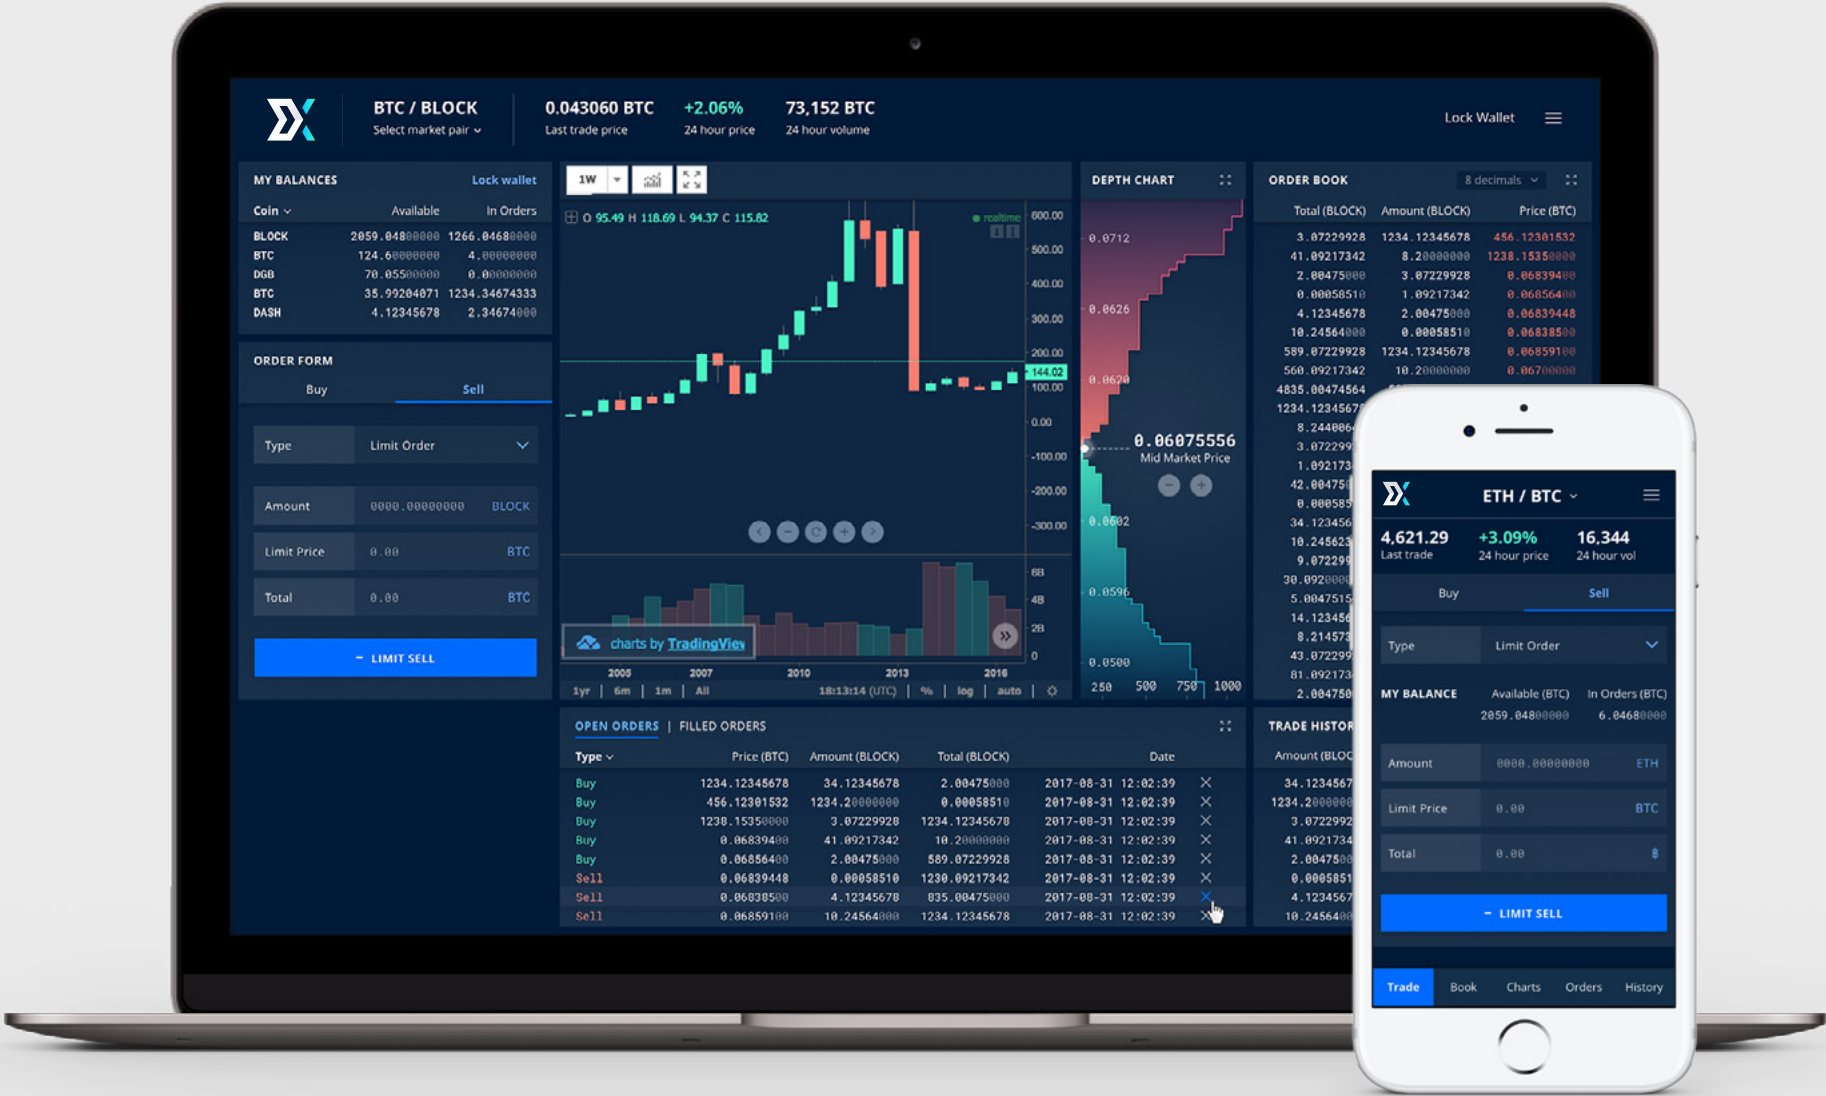

These structured patterns are examples of how the Block DX brand can visually come to life and begin to tell a story. By activating and deactivating parts of the pattern, the Block DX brand can bring energy and movement to communications.
